

San Diego Conveyor Accident Attorney

We all know conveyors are used in industries to transport goods and materials between stages of a process. Besides being productive, conveyors are a good way to reduce the risks of back injuries, knee shoulder and other orthopaedic injuries. However, despite their benefits, conveyors cause a high proportion on serious injuries and fatalities each year in the quarry, redi-mix, bag palletizer, retail, general manufacturing, metal working, pharmaceutical, food handling, food processing industries. Every year workers are seriously injured or killed as a result of conveyors. According to the

Most workers that work around conveyors on a day to day basis have no idea of the death and disfigurement caused by defective conveyors. Workers need to know about key conveyor safety features. Conveyors should be designed to minimize pinch points and hazard points.

If you or a loved one is injured in a conveyor accident, please consider contact Bill Turley of the The Turley Lawfirm
